and so really like her. Remember all the fun we

We, the Senior Class of 1959, dedicate this yearbook to Miss Nina Thompson who has been a great help to the students at Fergus County High School. We feel that without her help in the last four years many of the speeches, themes, activities and book reports that we completed would not have been. She has not only been a great help to the students but to the teachers as well. Without her help, we may assure you that the Senior Breakfast would not have gone over as well as it did. Miss Thompson has been in the library at Fergus for 11 years. We know that we cannot do enough for her for the big and even all the little things she has done for us. Miss Thompson, we bow to you.

Another year of educational opportunity at Fergus County High School has come to a close. Whether those opportunities will be stepping stones or stumbling blocks will depend on each student as an individual. The kind of citizenry that we shall have tomorrow rests upon the manner in which each student has handled the educational opportunities that are his today and his plan for meeting the educational challenge of tomorrow.

The greatest single force in the world today is knowledge. The ability and skill with which our young people acquire and use that force will shape the destiny of the future.

### DO YOU STILL BEAT RUGS AT YOUR HOUSE?

Few students probably even know what we're talking about when we ask, "Do you still beat rugs at your house?" But ask someone, some man - perhaps your Dad or a neighbor. He'll know.

Rug-beating used to take place about twice a year, in the fall and again in the spring. Mother usually directed the operation, which was untidy. Really, it was a mess. Tempers flared and usually the youngsters of the household beat the rugs with a vengeance. They took out their ire on the rug. Whaled the daylights out of it.

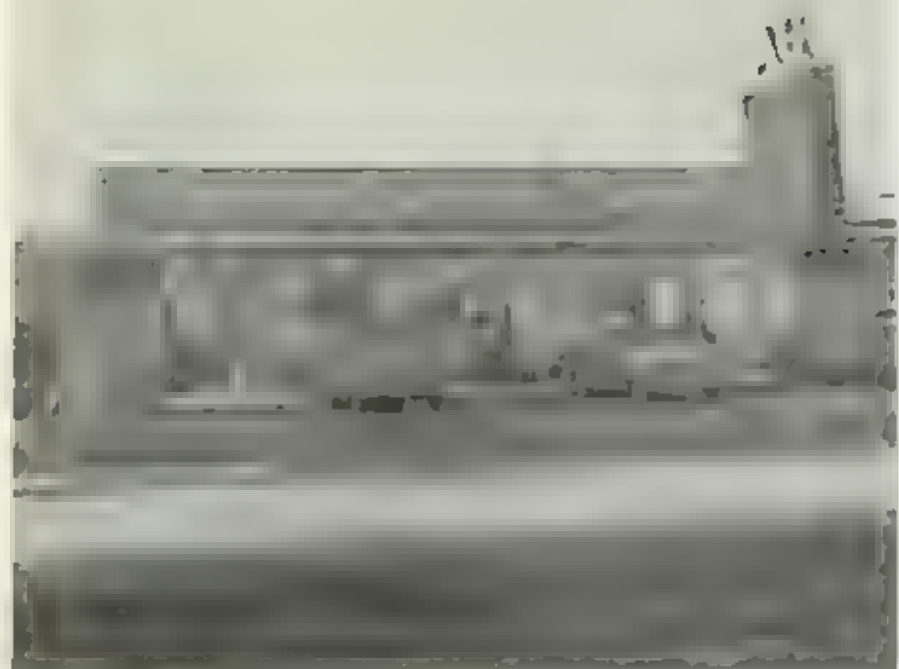

The idea was to get the rug clean. It worked, but the effort wore out the rug and the boys.

Today electricity cleans our rugs. It cleans our meals. It freezes our food. It whirs the fans. It turns the factory wheels. It lights our lamps. Electricity lightens all our burdens.

The men and women of the electric industry, using foresight and ingenuity to produce, transmit and distribute electricity, having done much for Montanans. Abundant electricity will continue to enrich the daily lives of the people of the Treasure State and help them produce more. We're planning and building now for your tomorrow.

You can count on us.
